

Second Quarter 2017 Highlights

August 14, 2017

Forward Looking Statements

This presentation contains statements about future results, plans and events that may constitute "forward-looking" statements within the meaning of the U.S. federal securities laws. The Company cautions you that the forward-looking information included in this presentation is not a guarantee of future events, and that actual events may differ materially from those made in or suggested by the forward-looking information contained in this presentation. In addition, forward-looking statements generally can be identified by the use of forward-looking terminology such as "may," "plan," "seek," "comfortable with," "will," "expect," "intend," "estimate," "anticipate," "believe" or "continue" or the negative thereof or variations thereon or similar terminology. Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's control. These risks and uncertainties include, but are not limited to, the factors described in the Company's historical filings with the NYDFS, and in the Company's, Syncora Guarantee Inc.'s and Syncora Capital Assurance Inc.'s GAAP and statutory financial statements, as applicable, posted on its website at www.syncora.com. Readers are cautioned not to place undue reliance on forward-looking statements which speak only as of the date they are made. The Company does not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statements are made.

Non-GAAP Financial Measures

This presentation references Non-GAAP operating income (loss) and adjusted book value (“Adjusted Book Value”), financial measures that are not calculated in accordance with GAAP. A Non-GAAP financial measure is a numerical measure of financial performance or financial position that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. While the Company does not manage its business or measure its performance using Non-GAAP measures, we are presenting these Non-GAAP financial measures because they provide greater transparency and enhanced visibility into the underlying performance of our business and, with respect to Adjusted Book Value, the effect of certain items that the Company believes will reverse from GAAP book value over time. In addition, we have included these measures because we believe they provide investors with important additional information to compare the Company to other financial guarantors. Non-GAAP operating income (loss) and Adjusted Book Value as calculated do not consider timing or amounts, if any, of payment on SGI’s surplus notes which would require NYDFS approval, dividend restrictions under New York Insurance Law applicable to the insurance subsidiaries and contractual constraints with respect to any dividend payment. Reference should be made to Note 20 in the most recently issued consolidated GAAP financial statements. In addition, because other financial guarantors may calculate Non-GAAP operating income (loss) and Adjusted Book Value or similarly titled measures differently, or may not be subject to the restrictions noted above, Non-GAAP operating income (loss) and Adjusted Book Value may not necessarily be comparable to similarly titled measures reported by other financial guarantors. Non-GAAP operating income (loss) and Adjusted Book Value are not substitutes for the most directly comparable GAAP measures, should not be viewed in isolation and may be subject to change.

In the fourth quarter of 2016, the Company revised its calculation of Non-GAAP measures in response to the U.S. Securities and Exchange Commission’s recent public views relating to the release of updated Compliance and Disclosure Interpretations on Non-GAAP measures (the “May 2016 C&DIs”). The Company had previously excluded the effects of consolidated variable interest entities (“VIEs”) in its calculation of Non-GAAP operating income and Adjusted Book Value. Beginning in the fourth quarter of 2016, the Company will no longer eliminate the effects of consolidated VIEs based on the May 2016 C&DIs. However, the Company has separately disclosed the effects of consolidated VIEs on its GAAP financial statements that were previously included as adjustments to its Non-GAAP measures. These disclosures can be found after the Non-GAAP operating income and Adjusted Book Value tables below. The previously reported Non-GAAP financial measures have been updated to reflect the revised calculation.

Key Highlights

Six Months Ended June 30, 2017 and 2016 - Financial Results:

- GAAP net (loss) income attributable to controlling interest of \$(69.5) million as compared to \$8.5 million.
- GAAP basic and diluted (loss) earnings per common share of \$(0.80) as compared to \$0.15.
- Non-GAAP operating (loss) income of \$(33.0) million as compared to \$81.2 million.
- Non-GAAP basic and diluted operating (loss) income per common share of \$(0.38) as compared to \$1.44.
- Adjusted Book Value of \$436.0 million as compared to \$484.1 million as of December 31, 2016.
- Adjusted Book Value per common share of \$5.02 as compared to \$5.59 as of December 31, 2016.

Insured Portfolio:

- Consolidated net par exposure decreased by \$3.4 billion to \$17.0 billion as of June 30, 2017 as compared to \$20.4 billion as of December 31, 2016.
- Total premium accelerations of \$13.9 million for the six months ended June 30, 2017 as compared to \$7.8 million for the six months ended June 30, 2016.
- Consolidated Below Investment Grade (BIG) net par exposure of \$2.4 billion as of June 30, 2017 as compared to \$2.8 billion as of December 31, 2016.
- GAAP BIG Flag List Leverage Ratio remained unchanged from December 31, 2016 to June 30, 2017 for SGI and decreased 0.32 from December 31, 2016 to June 30, 2017 for SCAI.

Subsequent Events:

- On June 14, 2017, the NYDFS approved a net payment of \$27.5 million on SGI's long-term and short-term surplus notes and such payments were made on July 24, 2017.
- In July 2017, SCAI paid approximately \$112.6 million in net claims, representing principal and interest due on July 1, 2017 maturities primarily related to general obligations bonds of the Commonwealth of Puerto Rico and PREPA exposure.
- On August 8, 2017, management, with Board of Directors approval, committed to a formal plan to sell American Roads LLC. Since the accounting criteria to be held-for-sale were met prior to the issuance of the consolidated financial statements, but subsequent to the balance sheet date (June 30, 2017), the Company has reflected this classification as a non-recognized subsequent event. Accordingly, the Company has provided pro forma information, which give effect as if the Company met the accounting criteria to be classified as held-for-sale as of June 30, 2017 and discontinued operations for the periods ended June 30, 2017 and 2016.

Financial Results

Adjusted Book Value per common share ⁽¹⁾	\$ 5.02	\$ 5.59	\$ 5.10	\$ 5.59

⁽¹⁾ Non-GAAP operating loss and adjusted book value are non-GAAP financial measures that exclude (or include) amounts that are included in (or excluded from) total Syncora Holdings Ltd. net loss and common shareholders' equity, respectively, which are presented in accordance with GAAP. See below for reconciliations between GAAP and Non-GAAP financial measures.

⁽²⁾ There are no adjustments to the pro forma 2017 and 2016 GAAP Income from discontinued operations; therefore, GAAP and Non-GAAP amounts are the same.

Financial Results

Non-GAAP Operating (Loss) Income per Common Share

Net income (loss) effects of VIE consolidation: GAAP requires the Company to consolidate certain VIEs that (a) have issued debt obligations that are insured and controlled by the Company and (b) were designed to effectively defease or, in-substance, commute the Company's exposure on certain of its other financial guaranty insurance policies. The effect on Net income of these consolidated VIEs was \$5.6 million and \$11.2 million for the six months ended June 30, 2017 and 2016, respectively and \$44.5 million, \$6.1 million and \$(58.5) million for the years ended December 31, 2016, 2015 and 2014, respectively. Had these financial guarantee VIEs been accounted for under the provisions of the Financial Services – Insurance Topic of the ASC, the effect on Net income would have been \$6.5 million and \$6.4 million for the six months ended June 30, 2017 and 2016, respectively and \$17.7 million, \$22.7 million and \$(49.2) million for the years ended December 31, 2016, 2015 and 2014, respectively. The net effect of these different accounting bases on Net income (including per share amounts) was \$0.9 million (\$0.01 per common share) and \$(4.8) million (\$(0.09) per common share) for the six months ended June 30, 2017 and 2016, respectively and \$(26.8) million (\$(0.39) per common share), \$16.6 million (\$0.29 per common share) and \$9.3 million (\$0.16 per common share) for the years ended December 31, 2016, 2015 and 2014, respectively. This is supplemental information only and is not a component of Non-GAAP operating income (loss).

^(*) There are no adjustments to the pro forma 2017 and 2016 GAAP Income from discontinued operations; therefore, GAAP and Non-GAAP amounts are the same.

Non-GAAP Operating Income (Loss) Adjustments

- (1) Elimination of non-credit impairment net realized and unrealized fair value (gains) and losses on credit derivatives in excess of the present value of the expected estimated economic credit losses, and non-economic payments. The fair value adjustments on derivative financial instruments are heavily influenced by, and fluctuate, in part according to, market interest rates, credit spreads and other factors that management cannot control or predict and that are not expected to result in an economic gain or loss. In addition, this adjustment presents all financial guaranty contracts on a more consistent basis of accounting, whether or not they are subject to derivative accounting rules.
- (2) Elimination of surplus note accretion as the full face amount of the surplus notes (including interest paid-in-kind) is included in the Adjusted Book Value calculation.
- (3) Elimination of net realized (gains) losses on the Company's investments, except for gains and losses on investments for which the fair value option of accounting was elected. The timing of realized gains and losses, which depends largely on market credit cycles, can vary considerably across periods. The timing of sales is largely subject to the Company's discretion and influenced by market opportunities, as well as the Company's tax and capital profile.
- (4) Elimination of expenses associated with the surplus note exchange offer and proxy solicitation for the variation of rights to the SHL Preferred Shares, which were part of Syncora Holdings US Inc.'s ("SHI") restructuring transactions completed on August 12, 2016. The elimination of such non-recurring, infrequent or unusual items presents expenses on a more consistent basis of accounting.
- (5) Elimination of the tax effects related to the above adjustments. SHI has a significant tax NOL that is offset by a full valuation allowance in the GAAP consolidated financial statements. As a result, for purposes of Non-GAAP measures, we utilize a 0% effective tax rate until the expiration of these NOLs.

Financial Results

Adjusted Book Value per Common Share

Total shareholders' equity effects of VIE consolidation: As described above, the Company consolidates certain VIEs. The net effect on Total shareholders' equity of these consolidated VIEs was \$78.1 million as of June 30, 2017 and \$80.7 million, \$51.9 million and \$67.3 million as of December 31, 2016, 2015 and 2014, respectively. Had these financial guarantee VIEs been accounted for under the provisions of the Financial Services – Insurance Topic of the ASC, the effect on Total shareholders' equity would have been \$123.3 million as of June 30, 2017 and \$127.0 million, \$121.8 million and \$120.7 million as of December 31, 2016, 2015 and 2014, respectively. The net effect of these different accounting bases on Total shareholders' equity (including per share amounts) was \$45.2 million (\$0.52 per common share) as of June 30, 2017 and \$46.3 million (\$0.53 per common share), \$69.9 million (\$1.24 per common share) and \$53.4 million (\$0.95 per common share) as of December 31, 2016, 2015 and 2014, respectively. This is supplemental information only and is not a component of Adjusted Book Value.

^(*) A pro forma 2016 reconciliation of GAAP Common Shareholders' Equity to Adjusted Book Value has not been presented as amounts are the same as 2016 Actual.

Adjusted Book Value Adjustments

- (1) Addition of the excess of the outstanding liquidation preference of the SHL Series A perpetual non-cumulative preferred shares and the SGI Series B non-cumulative preferred shares over their carrying values. Including the SHL Series A perpetual non-cumulative preferred shares and the SGI Series B non-cumulative preferred shares at their outstanding liquidation value (which, for the SGI Series B, is net of the shares received in connection with our 2012 settlement with Countrywide, Bank of America Corp.) instead of their carrying value is more in line with the residual value to common shareholders.
- (2) Elimination of pre-tax deferred acquisition costs as these amounts represent net deferred expenses that have already been paid and will be expensed in future accounting periods.
- (3) Elimination of the consolidated net credit derivative liability which represents an estimate of the fair value of the Company's guarantees issued as CDS contracts in excess of the present value of the expected losses. By excluding the net credit derivative liability, this metric eliminates the benefit to our shareholders' equity embedded therein from the Company's non-performance risk, which reflects the market's view of the risk that the Company will not be able to financially honor its obligations as they become due. The fair value adjustments on derivative financial instruments are heavily influenced by, and fluctuate, in part according to, market interest rates, credit spreads and other factors that management cannot control or predict and that are not expected to result in an economic gain or loss. In addition, by including our best estimate of losses we expect to incur on our CDS contracts if we were to hold such CDS contracts to maturity and pay claims as they arise over the remaining life of such contracts, the metric presents our guarantees of insurance and derivatives on a consistent basis, which results in a more meaningful measure of our value.
- (4) Addition of the pre-tax net present value of estimated net future credit derivative revenue. Including the net present value of estimated net future credit derivative revenue enables an evaluation of the value of future estimated credit derivative revenue for which there is no corresponding GAAP financial measure.
- (5) Addition of the pre-tax value of the unearned premium reserve on financial guaranty contracts in excess of expected losses to be expensed on an individual policy level, net of reinsurance as the unearned premium reserve on financial guaranty contracts represents revenues that are expected to be earned in the future.
- (6) Addition to the full face amount, in excess of the carrying amount, of the surplus notes payable held by third parties (including interest paid-in-kind), as including the full face amount of the surplus notes is consistent with the treatment of these instruments as debt.
- (7) Elimination of the pre-tax unrealized gains on the Company's investments that are recorded as a component of accumulated other comprehensive income ("AOCI"), excluding the effects of foreign exchange. The effects of the AOCI component of the fair value adjustment on investments are not deemed economic until the Company sells such investments.
- (8) Elimination of the tax effects related to the above adjustments. SHI has a significant tax NOL that is offset by a full valuation allowance in the GAAP consolidated financial statements. As a result, for purposes of Non-GAAP measures, we utilize a 0% effective tax rate until the expiration of these NOLs.

Insured Portfolio Overview: SHL

SHL's **June 30, 2017** portfolio consists of 639 credits totaling \$17.0BN in net par exposure. Average internal rating⁽¹⁾ of the SHL portfolio is 'bbb+'. 14% or \$2.4BN⁽²⁾ of SHL's portfolio is internally rated Below Investment Grade (BIG).

SHL's **December 31, 2016** portfolio consists of 819 credits totaling \$20.4BN in net par exposure. Average internal rating⁽¹⁾ of the SHL portfolio is 'bbb+'. 14% or \$2.8BN⁽²⁾ of SHL's portfolio is internally rated Below Investment Grade (BIG).

(1) Syncora's GAAP Flag List consists of all BIG credits plus credits on Syncora's Special Monitoring List (not including those credits in CDS form which are carried at fair value). The Special Monitoring List is defined as those credits that are viewed as low investment grade where a material covenant or trigger may be breached and increased surveillance is warranted.

Note: The above tables do not reflect potential remediation and refundings.

SHL Projected Gross Claims on Loss List Credits: FY2017-2059

- SHL faces a potential liquidity mismatch between expected future claims payments and recoveries relating to these claims.
 - As of June 30, 2017, SHL (through its insurance subsidiaries) anticipates that it will be requested to make gross claim payments in the period 2017 – 2029 of approximately \$444.6 million (\$180.7 million relates to SGI) based on expected loss exposures without regard to potential adverse development on loss and other portfolio exposures – see disclosures on following page.
- SCAI has significant public finance exposures, which pose a risk of material adverse development to SCAI’s short to medium-term liquidity position.

⁽¹⁾ Represents estimated undiscounted cash outflows under direct and assumed financial guaranty contracts, excluding remediated claims and after ceded reinsurance.

SGI Significant Refinancing Risk Credits' NPO

- SGI also remains exposed to transactions with refinancing risk through 2019 including (a) one refinancing risk credit with a heightened risk of material claims payments with an aggregate par outstanding of \$850.9 million, and (b) a number of other credits with exposure to refinancing risk and the risk of material principal repayments with an aggregate par outstanding of \$1.7 billion.
- See the description of significant risks and uncertainties in Note 2 of SHL's recently issued consolidated GAAP financial statements for further discussion.

Puerto Rico Exposure

As of June 30, 2017 and December 31, 2016 (in \$MM)

Status of Affirmative Litigations⁽¹⁾

Litigation Case	Current Status (as of August 8, 2017)
<p>U.S. Bank Nat'l. Ass'n., as Indenture Trustee for the Benefit of the Insurers and Noteholders of GreenPoint Mortgage Funding Trust 2006-HE1, Home Equity Loan Asset-Backed Notes, Series 2006-HE1 v GreenPoint Mortgage Funding, Inc. – New York State Supreme Court, Index No. 600352/09</p>	<ul style="list-style-type: none"> On February 5, 2009, Syncora Guarantee, together with co-plaintiffs U.S. Bank National Association, as Indenture Trustee (“US Bank”) and CIFG Assurance North America, Inc., now merged with and into Assured Guaranty Corp. (“CIFG”), filed suit in the Supreme Court of the State of New York, New York County, against GreenPoint (the “GreenPoint State Action”), alleging that GreenPoint breached representations and warranties that would require repurchase of the breaching mortgage loans and/or the entire loan pool and/or payment of damages in connection with a securitization of primarily home-equity mortgage loans originated by GreenPoint (the “2006-HE1 Securitization”), which was sponsored by Lehman Brothers Holdings Inc.. In 2010, Syncora Guarantee was dismissed from the case after the Court found that it (as well as CIFG) lacked standing to pursue direct claims against GreenPoint. On December 16, 2013, GreenPoint moved to dismiss the remaining claims of US Bank on the grounds that it too lacked standing. US Bank cross-moved for partial summary judgment striking GreenPoint’s defense that US Bank lacked standing to directly pursue GreenPoint. On January 28, 2016, the Court rejected GreenPoint’s motion for summary judgment and granted US Bank’s cross-motion for partial summary judgment, finding that as a matter of law US Bank has standing to directly assert claims against GreenPoint. GreenPoint perfected its appeal on November 28, 2016 and this appeal is now fully briefed. Oral argument before the Appellate Division was held on May 2, 2017. Discovery in the trial court is ongoing. On July 14, 2017, GreenPoint filed notice of its intention to appeal the trial court’s denial of its discovery requests relating to Syncora Guarantee and on August 7, 2017, GreenPoint perfected this appeal.
<p>Syncora Guarantee Inc. v Alinda Capital Partners LLC, American Roads LLC, Macquarie Securities (USA) Inc., and John S. Laxmi – New York State Supreme Court, Index No. 651258/2012</p>	<ul style="list-style-type: none"> On April 18, 2012, Syncora Guarantee initiated an action in the Supreme Court of the State of New York against Macquarie Capital (USA) Inc. (“Macquarie”), among others. The case remains pending only against Macquarie, with Syncora Guarantee having entered into a stipulation dismissing the other defendants from the lawsuit. Syncora Guarantee alleges that Macquarie made misrepresentations and omissions in obtaining insurance in connection with a bond offering by American Roads LLC. Macquarie’s initial motion to dismiss the claims was denied in its entirety and decided in Syncora Guarantee’s favor. On September 28, 2015, Syncora Guarantee filed a motion to amend its complaint to include additional allegations against Macquarie. In May 2016, Macquarie filed a motion to dismiss Syncora Guarantee’s amended complaint and, in the alternative, to narrow Syncora Guarantee’s claims and damages. On February 15, 2017, the court ruled on Macquarie’s motion to dismiss. The court sustained Syncora Guarantee’s fraud and negligent misrepresentation claims for compensatory damages but dismissed Syncora Guarantee’s claims for “rescissory” damages and punitive damages. The court also rejected Macquarie’s request to strike the amended complaint’s reference to Section 3105. Pretrial discovery is continuing and is anticipated to conclude in 2017.

⁽¹⁾ These litigations are Syncora’s affirmative litigations. Syncora is also a defendant in certain litigations. Descriptions of these litigations can be found in Syncora’s financial statements Information disclosed herein is accurate as of the date indicated. The information included in this slide may change from time to time without notice, and Syncora Holdings Ltd. is under no duty or obligation to update this information.

⁽¹⁾ A credit is a unique combination of obligor, legal security and seniority level that defines the repayment risk that Syncora faces. A credit may have only one credit rating.

⁽²⁾ Internal ratings are provided solely to indicate the underlying credit quality of guaranteed obligations based on the Company's view, before giving effect to the guarantee. The Company's rating symbology has a one-to-one correspondence to the ratings symbologies used by S&P and Moody's (e.g., aa3 = AA- = Aa3, bbb2 = BBB = Baa2, etc.) except in the cases of loss reserve credits. For these credits, the Company assigns "d" ratings to insured transactions where the transaction has resulted in a paid claim and a loss reserve has been established. "c" ratings are assigned for insured transactions where a future claim is expected but recovery is in doubt and a loss reserve has been established.
